**LOSTANGELS—World’s first flying car is a breakthrough and will change future transportation, but experts pointed out that problems need to be addressed before cars can really fly at will**

**Los Angeles—World’s first flying car is a breakthrough and will change future transportation, but experts pointed out that problems need to be addressed before cars can really fly at will.**

The Los Angeles Department of Transportation has awarded Terrafugia Transition, told Xinhua that the vehicle will provide more mobility and convenience for travelers.

**The vehicle’s formal name is Terrafugia Transition Roadable Aircraft.** It is classified as a Light Sport Aircraft. Therefore, it is a civilian aircraft. It requires a Sport Pilot certificate to fly and a driver’s license to drive the road.

Richard Gersh, Vice President of Business Development at Terrafugia Transition told Xinhua that the company has overcome the technical and regulatory challenges necessary to bring Terrafugia Transition to market.
