I think all the Swapo comrades should start celebrating the victory of Swapo for 2009 Presidential and National Assembly election, as it is evident that from all the well attended Swapo rallies, that Swapo already won the election; for me what is left is just the result to be announced officially by ECN. Yanagolo like is a spoke person for the western and European force in their efforts to cause disunity among the Namibian people, who are united under SWAPO. I would like to send a stern warning to Yanagolo that more than ever the spirit of the Namibian people is strong and can not be broken, we will defeat you, smartly, comes November 27-28. It is a well known fact that all Yanagolo is doing is to keep bucking to make sure that his western master provides him with food. To fellow Namibians, we know that the challenges facing our country are so many, and that they can not be met in a short span of time, but know this Namibia, under the Swapo led government, they will be met. Long live the people of Namibia, long live the Swapo party and I thank you.

The Issue of "BIG" cde Kanamwenjo is a reality, cdes why do we always focus on negative? Let us be realistic and think of genuine future to eradicate poverty in this country, it sad always just to read people indicating only the negativity, do we think our people are alcoholic? No, I do think so, please read more about the outcome of the research and findings for the area where "BIG" was introduced and you see that it had make positive impact in our people, after all if you talk of alcohol, tell me how many people misused their salaries in alcohol and gambling? People come on! Namibian let us have mercy and thinking to help other to save Nave Namibia from poverty alleviation, and this is I believe a Namibian initiative by Namibians and needs our support. Together we can do it and one day we will feel proud to have achieved one thing in common together.

On the issue of the BASIC INCOME GRANT raised by Kanamutenya, I have sympathy for the proposal but my worry is the drinking culture of our people. If I do not spend my money on alcohol, I will be in so much pain to see part of my money being used for that purpose. Let us continue to debate the issue.

Are You Ready to Share? "Basic Income Grant Coalition" I think as a Nation we must implement BIG(Basic Income Coalition) It will make a difference in our community, I would not even be bothered if the government introduce a law that every employ must be deducted at least N\$5.00 to complement to establishment of the fund, I think it will make a difference, we must know that there are people in this country who are in need, therefore if BIB had been implemented it will be a good example to some African country and I am sure they follow suit, remember in African continent there few countries that give old people pension, thus this scheme was established in Namibia before independence, is for us also to do something to our people that make them feel human, imagine 6 people living in one house? this means N\$600.00 in that house and is better than nothing at all, let us all think about this important obligation to all loving Namibians. Remember comrades let us go and Vote for Mighty SWAPO PARTY!!!!VIVA!!!!!!

SWAPO Party is here to stay. We will change the living standards of the people, as we have done since independence. When we in SWAPO speak about change, we mean meaningful, and genuine change, improvement of the living standards of our citizens by providing them with clean water, shelter and creation of work. We will implement the SWAPO Party manifesto by ensuring that those tasked with the implementation of policies and programmes do so with utmost diligence and efficiency.

It appears, however, that when our opponents are talking about change, they mean change of government, to remove SWAPO Party government. Independence is an expensive undertaking: the blood of our heroes and heroines should never be in vain, we must safeguard our revolutionary gains to the bitter end.

How can we do this? Rallying behind SWAPO, by giving SWAPO Party yet another mandate to rule and implement its programmes of reconstructing the economy is the right. Namibians are fortunate to have a ruling party with an impressive and sound record of achievements in terms Government service delivery, improvement of public service delivery, Economic Management growth and employment creation, an average of 4.7% GDP growth was recorded between 2005 – 2008, N\$54 billion investment was made between 2005 – 2008 etc, HIV in pregnant mothers has been reduced from 22% to 17.8% (2001 – 2005), 70 000 people are on anti retroviral therapy – 90% of infected people.

Thanks to SWAPO Party government for the peace we are enjoying today, the best modern infrastructure such as roads, telecommunication and transport, these are very crucial for an industrialised nation.

As we are looking forward with determination and courage to the year 2030, the nation under the leadership of SWAPO Party is in full gear to prepare itself for an exciting era. We will match into 2030 knowing very well that both our political leaders and academics will not let us down in equipping the nation's human capital adequately, thereby guaranteeing quality of life and prosperity of all our people. Continue to have confidence in SWAPO Party and SWAPO Party leadership will deliver the goods.

SWAPO is determined to uplift the living standards of its people. NDP 3 is paving the way for the attainment of Vision 2030. I urge those entrusted with the implementation of our national programmes once again to do so without further delay. Remember, sitting on those programmes shall not only hurt the SWAPO Party government and its members but the entire nation, including those in opposition.

As for the born frees this is your time to retaliate peacefully. This is your time to vindicate yourselves. This is an hour to honour your forefathers, the Namibian heroes and heroines who paid supreme sacrifices for you and you alone to be born free; free from bondage of colonialism, suppression and oppression, free from exploitation of man by man, you should be proud to be born free.

Therefore, retain your freedom, vote SWAPO Party to ensure you remain free forever. Don't allow yourselves to be sweet talked, by those with no good intention. Stability is crucial. Dear born frees, SWAPO Party is the only party in this country which can claim to have worked with the suffering masses from colonialism since 1960 to the dawn of freedom in 1990 and finally to the consolidation of our freedom and independence and the spearheading of the reconstruction of our economy.

I am appealing to you the authentic sons and daughters of the land, children whose fathers and mothers endured untold sufferings, I am appealing to the orphans who did not have an opportunity to enjoy the love of the parents and or enjoy basic services like other children of the world. Surely you sons and daughters of the land, history will judge you harshly if you let go the golden opportunity at your door steps.

You can surely not afford to betray your forefathers, your parents, your brothers and sisters who came before you, and made supreme sacrifices just for you to be born free. I'm therefore giving you a patriotic marching order; Go and do the right thing, vote SWAPO party and Comrade Hifikepunye Pohamba for President.

Yes we are not claiming that all is well, all we are saying is that at least SWAPO has made a difference. At least one can predict our action as a party unlike others.

Country men and women we have spoken, His Excellency the President, SWAPO presidential candidate has said it all, in all 13 regions. Now is your chance (turn) to exercise your right. I rest my case, now let the pencils and ballot papers do the talking. VIVA SWAPO
