Now that the minister of education and his staff are hard in work in the education sector more preferable with preprimary, I think it should also be wisely thought to separate the education into two, BASIC Education Ministry and HIGH EDUCATION ministry in order to have enough budget which will be specifically directed to each ministry! More tertiary institutions are required/ needed in this country in order to cater due to the number of students to be enrolled into high education.

Oh Man! Opposition with another appeal?, What a mockery and waste of time and resources, Namibians we should start to smell the coffee, if the margin is so large what is the use of underestimate the intelligence of the majority who voted for the winning party? Always (Oppositions) come up with the excuses? I think time will come when these projects will learn a lesson; the next election is so closer let us see what will happen? And see how some of these so called parties dying a natural death, let us see time will tell, however they have to blame themselves for being selfish and wasting precious time with their draconic reasoning!!!!!!!!!!!!!!

Cde.Kanamutenya,I agree with you, we need to build a second University rather than promoting Polytechnic of Namibia.A second University should be build outside of Windhoek as I alluded in my previous posting.In order for us to achieve vision 2030.We need educated Namibian people to take control of our Industry and develop our country further.We need free education that will enables children from rich families and those from poor families to receive the same education.What differentiate children today after grade 12 is that those from rich families will access tertiary education and those from poor families only a small percentage access tertiary education as Polytech-

nic of Namibia will ask them to pay a deposit of N\$ 2000.00 before register, while their parents are even struggling to pay for the transport and accomodation costs.Free,Free,Free education is the answer!Aluta Continua!!!!!!!!!!!!

Namibia need another University completely from UNAM and Polytechnic , with different leadership, in this case we can achieve what we want to(Vision 2030), because I do think the decision -making should start thinking now about new University, may be in the Kara's Region for instances where there are plenty of Mineral resources, this university should specially targeting fields such geology, geo-physics, surveying just to mention few, by doing that we gone develop the region as well, so each every person interested in studying in those fields either a national or expatriates will be accommodated there, or University of Agriculture in the North-Eastern in Rundu or Katima Mulilo where there is plenty of fertile land for agricultural process and to have more colleges, because technical's with diplomas are more needed for any emerging economy, we must stop blaming the failures of grades 12 for now because even if they could pass all where are you going to place them? Blaming and blaming the education system while we have no facility to accommodate the passing students?

◆ Posted by cde Kanamutenya, whk
Yes, it is true cde Katusha kaNamibia, what you have said about Poly of Namibia, they should allow students to register with the letter from the Ministry of education (loan approval), and however there is only one tendency here in Namibia which I personal fail to understand why? Most of people got their qualification trough helps from GRN or other institution, for them to be where they are today, and now you found that they are denying others opportunities, even themselves never be able to pay for their studies and today they wants others to suffer why? This kind of mentality must come to

an end and let us start helping our children to further their studies!!!!!! A caring institution and nation will always promote peaceful and tranquility.

Dear Comrades,This is a call for Dr.Iyambo to look into the Polytechnic of Namibia,s matter as the institution does not want to register students that are using a letters from Namibia Students Financial Assistance Fund[NSFAF]. Polytechnic of Namibia is demanding students to pay N\$ 2000.00 deposit.Some of the students are orphans or they parents cannot afford to pay N\$ 2000.00 deposit.This unpopular decision of Polytechnic of Namibia leave many orphans and vulnerable children out of the tertiary education,except for those qualified for admission at UNAM.Polytechnic of Namibia is 100% own by the Government,that is why receiving subsidy every financial year.Therefore Dr.Iyambo should call Polytechnic of Namibia to order and register students in 2012,using letters from NSFAF.I therefore do not support for Polytechnic of Namibia to become a second University,but rather build a second University outside of Windhoek to cut transport and accomodation costs for may parents/Guadians out there!Aluta Continua

Forgive yes, forget no from page 1

1987 — A captured former PLAN combatant, tortured and stabbed with screwdrivers to reveal the whereabouts of PLAN combatants. He did not, but was later executed deep in the bush in northern Namibia. Imagine the excruciating pain he went through during his last moments. One of the white Ex-Koevoet who tortured him has more of these photos and will soon hand them over to Namibia Today.

that they were PLAN combatants, when in fact they knew they were not. They beat them senseless, and later shot them dead at point blank.

“Some of them now want to come here and apologize. They were hardened and really believed that they were fighting communists who were bent on taking over southern Africa.”

Namibia Today is in possession of about 500 of those photos taken during the war, showing captured PLAN combatants killed at point blank. Some of the white soldiers were photographed next to the corpses while drinking beers or smoking cigarettes.

In style, the photos are similar to those taken by American soldiers during the invasion of Iraq, which showed happy US soldiers photographed next to the corpses of prisoners of war, while smoking or drinking at Abu Ghraib Maximum Prison.

The Abu Ghraib photos revealed by the media in 2004 shocked the world and embarrassed Washington, as these ones too will embarrass the Boers and the former apartheid leaders. We publish one photo from Abu Ghraib Prison to show the similarities between what the Americans did in Iraq and what the Boers did here.

The Americans did what they did in Iraq to “save democracy.” The Boers did what they did here to “save apartheid colonialism” and “contain the spread of communism.” None of the people the Boers killed was ever a communist.

One SWAPO Party Central Committee member who saw the photos was left wordless, gasping in disbelief that a human being could really enjoy being photographed next to decomposing corpses and had the audacity to drink a beer or smoke a cigarette.

“I am shocked by these photos,” he said. “What kind of human beings are these? Now I understand why such people have sleepless nights these days. The fact that some have even become born-again pastors tells a lot.

“Obviously, they could not brutalize people like that hope to enjoy life to the end, as if nothing has happened. Now, they reaping rewards for their ugly deeds. God is great. Now it is their turn to suffer psychologically.

“If this was the price Namibians had to pay for their independence, Namibian should not take the peace and independence we are enjoying today for granted. National reconciliation can only teach us to forgive, but certainly not to forget.

“Such photos must be kept so that succeeding generations can be taught and shown the painful and bloody path we walked through to independence. Some people forget easily, but such photos should remind them about where we came from as a nation and what it really took to nurture and build the “One Namibia One Nation” that we are so proud of today.

“Sam Nujoma is great. By adopting the Policy of National Reconciliation, he gave us hope and steered us to peace and stability, leaving that ugly past behind us. “

What US soldiers did in Iraq is what the Boers did in northern Namibia.

Lynndie England holding a leash attached to a prisoner, known to the guards as “Gus”, who is lying on the floor.

It's the “liberation” of the Iraqi people – and it isn't pretty....
